

Anchor Sober Living is a GARR Certified Recovery Resident Community for men early in the recovery process. We help men live life in recovery. Through the support and guidance of our staff, we provide a safe, structured, and supportive sober living community designed to help men not yet ready to return home or to live on their own while their sobriety is still fragile. Our program does more than encourage abstinence and a sober lifestyle. Through our L.I.F.E skills program, we equip our community members with a set of skills designed to help them learn how to create structure in their lives and meet the day-to-day expectations that a life in recovery demands.
